Personal Safety Equipment

With increased emphasis placed on safety at the railroad, the Friends are obligated to become compliant with the adopted standards. With that comes the need to upgrade all personal protective equipment (PPE). In doing so, we realize that many of you volunteering on the railroad are using equipment that is currently **not certifiable or may be past its life expectancy**.

Since this change in safety criteria a new Friends safety manual has been published (2019), see Form R-8 for an updated version dated 12/19/2023, that references specific types of safety equipment now mandated. Compliance is required to meet American National Safety Institute (ANSI) and the Occupational Safety and Health Administration (OSHA) standards. Equipment included for purchase on this form complies with those standards.

With that in mind, **your hard hat is out of date if manufactured in 2019 or earlier**. The Friends have undertaken the task to provide you, “Friends members”, with the opportunity to obtain the most up to date safety equipment at cost. The new PPE is required to be worn when working on projects at a work site or while working on the Railroad. If you have existing safety equipment that you believe may meet the current standard you are welcome to bring it in to have it certified by the railroad safety officer. All hard hats must have a manufacturers sticker on the inside of the hat that attests to the standards and date of manufacture see below. **Hard hats 5 years or older from date of manufacture must be replaced.**

How can you tell the date your hardhat was manufactured? You will need to look hard as the cycle calendar stamp, it is only 7/16 in size. It is generally located on the brim of the hat. The image above is an enlargement of that “cycle calendar” manufacturers’ affix to the hardhat to tell the month and year of manufacture. The two center numbers (each side of the arrow) are the year of manufacture. The arrow points to the month of the year. This hard hat example was manufactured in January of 2020. The following are PPE equipment selections available to members. The descriptions are taken the supplier’s WEB site.

Hard Hat Selection

NSI Power Shell® II 4-Point Ratchet Suspension Full Brim Hard Hat

Get the power

Lightweight, yet rugged high-density polyethylene construction provides excellent protection and comfortable wear
Comfortable, 4-point suspension with vertical height adjustment assures a personal, secure fit

Moisture-wicking, polyester brow pad helps keep sweat out of wearer's face
design offers added protection against rain, sun, and snow
complies with ANSI Z89.1-2009, Type I, Class E and G standards

Item # 23189

NSI Power Shell® 4-Point Ratchet Suspension Cap Hard Hat

Get the power

Choose this feature packed hard hat for excellent protection and comfort - and keep your safety budget under control. Light weight, yet rugged
polyethylene shell offers excellent head protection

Low profile hard hat design features comfortable 4-point Flex-Gear® suspension

Hats include rain trough and accessory slots for use with cap mount muffs, face shields, communication devices, and more

Soft, absorbent, replaceable cotton brow pad with cushion pillows ensures maximum comfort
